

San Antonio deserves leaders who will fight to ensure our city remains **a great place to live, work, and raise a family.**

CANDIDATES FOR CITY COUNCIL SHOULD PLEDGE TO:

Prioritize essential city services like roads, water, public safety, and basic infrastructure.

Reinstate the Mayor's Utility Task Force, a successful program under Mayors Taylor and Nirenberg that brought city and business leaders together to hold our public utility companies accountable, improve utility service and responsiveness, and keep rates low for residents and businesses.

Create a city-wide plan for **increasing the supply of affordable and market-rate housing** that prioritizes the creation of housing units of all types, reduces barriers to development, and incentivizes the creation of multi-unit housing. Keep standards and regulations for new development projects consistent.

Improve transparency at City Hall and increase accessibility to city services.

Keep taxes low on homeowners and businesses.

Create a pro job and pro economic growth environment. Eliminate unnecessary fees and regulations. Promote new development that improves local quality of life and attracts new business.

Focus on business retention and relocation. Create an objective, baseline incentive plan for business relocation that is fair and predictable, without dictating location, giving business owners a greater say in which part of the city they want to operate and house their employees.

Deliver on the city's commitment to pro sports and bringing more conventions and economic opportunity to downtown by **supporting a reasonable deal for Project Marvel.**
